## Native Language & Technology Workshops

In these Native Language and Technology Workshops you will learn how to use technology tools to create professional quality print and audiovisual materials in your Native Language. The workshops are held at ILI's Technology Learning Center in Santa Fe, New Mexico. Workshop One is Desktop Publishing and Workshop Two is Digital Storytelling. Contact ILI if you are interested in bringing these Workshops to your community.

### WORKSHOP ONE: DESKTOP PUBLISHING CREATE NATIVE LANGUAGE PRINT MATERIALS

**Desktop Publishing** is a creative and invaluable way of incorporating Native Language into everyday teaching materials. Where there are no materials in the Native Language, create your own.

This four-day training workshop at ILI's Technology Learning Center in Santa Fe, New Mexico provides participants with computer and multimedia technology skills to create materials in print in the Native languages such as: storybooks, flash cards, brochures, calendars, newsletters, business cards, stationary, posters, flyers, visual aids for classrooms, etc.

Instructors provide hands on training on the following technology skills:

1. Microsoft Publisher features to produce dynamic print materials
2. Scanning technology to add locally created and culturally appropriate images (e.g. artwork, photos, drawings or illustrations) to accompany Native text and stories
3. Using Audacity you can create audio recording for "audio books" (CDs) to accompany the print materials
4. Photo/Graphics software - GIMP
5. Languagegeek Native language keyboards and fonts

### WORKSHOP TWO: DIGITAL STORYTELLING CREATE A NATIVE LANGUAGE DIGITAL STORY

**Digital Storytelling** is a modern way to express the ancient art of storytelling by weaving together your Native Language, images, music and voice narration.

This four-day training workshop at ILI's Technology Learning Center in Santa Fe, New Mexico provides participants with computer and multimedia technology skills to create short (3-5 minute) audiovisual stories in the Native languages using a computer. Workshops are offered in Windows platform for MovieMaker 2012 (part of Windows Essentials 2012 for Windows 7, 8, 8.1 and 10). Participants bring a story they want to tell, incorporating visual materials (e.g. photos, artwork or small video clips) and audio materials in the Native Language (e.g. songs, music or narration).

Instructors provide hands on training on the following technology skills:

1. Photo/Graphics software - GIMP
2. Movie editing software - MovieMaker
3. Audio software - Audacity
4. Media Players - MP3
5. Scanning technology to add images to accompany audio content
